Aerospace Workshops

From soaring into the sky to exploring deep space, lead students on an unforgettable aerospace exploration journey! Participants will learn about career pathways to becoming a pilot, experience flight simulation, and explore aerodynamics. They will also gain deep insights into Mars missions and space technology by hands-on crafting airplane models, Mars rovers, rocket launchpads, and re-entry capsules. Through learning STEM and engineering principles, students will unlock creativity, teamwork, and problem-solving skills to achieve their aerospace dreams step by step!

Aviation Dreams Career Planning Workshop

- Insights on pilot entry pathways and aviation career planning shared by Private Pilot License (PPL) ground instructors or commercial airline pilots.
- Flight simulation experience to understand practical flight operations and key safety procedures.
- Hands-on aircraft model building to explore the relationship between fuselage design and airflow/aerodynamics.

Target Primary 4 to Secondary 6 Students
Duration 1.5 - 2 Hours
Capacity 30+ participants

Colonizing Mars is Not a Dream

- Build models of the Solar System and Mars rovers, guiding students to explore the mysteries of the solar system and understand environmental challenges on Mars.
- Craft straw rockets and re-entry capsules to discover various spacecraft types and master scientific principles behind rocket launch and recovery.

Target Kindergarten Students & Parents
Duration 2 Hours
Capacity 30+ participants

Mars Rover & Rocket Launchpad Dream Workshop

- Unleash creativity to design unique Mars rovers, gain deep insights into Mars mission challenges, and learn about common sensors, China's space program developments, and space tech applications.
- Utilize geometric truss structures and teamwork to build rocket launchpads and catapult devices, exploring underlying engineering concepts.

Target Primary 1 to 6 Students
Capacity 30+ participants
Duration 2 Hours

Rocket Competition & Space Station Construction

- Construct a Mars base to thoroughly analyze the Martian environment and examine practical.
- Engage in rocket launch competitions and space station construction for first-hand engineering experience in rocket propulsion and recovery; integrate space tech with national security concepts to learn about cutting-edge launch bases and spaceports. applications and functions of various sensors.

Target Secondary 1 to 6 Students
Capacity 30+ participants
Duration 2 Hours
